Starrsed Saline**Intended purpose**

Product for the automatic cleaning of the needle and fill-nozzle assembly in Starrsed ESR analyzers. The product is ready to use, see the instrument manual for instructions.

Instructions For Use

The product is for use on the Starrsed analysers only. The product is ready to use, refer to the Starrsed instrument manual for detailed instructions.

1. Remove level sensor and spacer from the empty container in the instrument.
2. Remove empty container.
3. Place the new container.
4. Open the box by tearing off the perforated part on top of the box.
5. Remove the container screw cap and pull the neck of the bottle pack out of the cardboard box.
6. Install the level sensor and spacer according to the pictures provided in the Starrsed instrument manual .
Make sure to place the appropriate level sensor in the container by matching the color code on the tube and on the container label.
7. Select the PRIME function in the Starrsed instrument software to perform the prime.

Chemical/Physical data

Contains an isotonic cleaning reagent, phosphate buffered (<2 ‰ by weight) including some excipients (salt and wetting agent; <8 ‰ by weight in total) and the preservative sodium azide (< 0.5 ‰ by weight).
The latest version of the Safety Data Sheet is available on the website www.rmechatronics.com

Transport/Storage/Packaging

Stability during transport: 5 - 60 °C (maximum of 14 days)

Store at 5 - 35 °C in dry conditions in well sealed containers.

Starrsed Saline is supplied in 5 Liter containers, LxWxH 19x19x19 cm.

Safety

Any serious incident that has occurred in relation to this product must be reported to the distributor and/or manufacturer and the competent local authorities.

Shelf life

After production: 3 years, but no longer than the expiry date.
